

Naval Oli

Frontend Developer — Angular & React Specialist — 3.7+ Years Experience

📍 Noida, India ✉ navaloli007@gmail.com ☎ +91-9205612965 🔗 LinkedIn 📄 GitHub 📁 Portfolio

PROFESSIONAL SUMMARY

Performance-driven **Frontend Developer** with 3.7+ years of experience steering client-facing digital transformation journeys and engineering high-performance enterprise web applications. Specialized in **Angular, React, TypeScript, Component-Based Architecture, and State Management (RxJS, Redux)**. Proven track record of designing scalable frontend architectures, optimizing application performance via SSR/SSG, and seamless API integrations. Expert in collaborating with cross-functional teams to translate complex business needs into intuitive user interfaces, implementing rigorous code quality standards, and mitigating risks within Agile/Scrum methodologies.

CORE COMPETENCIES & SKILLS

Frontend Technologies: Angular (v9-v19), React.js, TypeScript, RxJS, JavaScript (ES6+), HTML5, CSS3

UI Libraries & Design Systems: Tailwind CSS, Material UI (MUI), PrimeNG, Bootstrap, Flexbox, UI/UX Layouts

Architecture, API & State Management: Component Architecture, Server-Side Rendering (SSR), NgRx, Redux Toolkit

Testing & Code Quality Assurance: Unit Testing (Jest, Jasmine, Karma), Browser DevTools, Peer Code Reviews

Methodologies & Operations: Agile/Scrum, Sprint Planning, Git, GitHub, JIRA, Technical Risk Planning

PROFESSIONAL EXPERIENCE

Software Engineer (UI & Frontend Focus)

Apr 2025 – Present

Nexon Software Solutions, Noida

- Interfaced directly with global enterprise client (**Optum Global**) to lead frontend digital transformation tracks, delivering scalable web applications using **Angular** and **React** ecosystems.
- **Internal ATS & Corporate Website:** Architected a proprietary Applicant Tracking System (ATS) to streamline the internal recruitment lifecycle, and developed the official Nexon corporate website to elevate their digital brand presence.
- Conceptualized architecture blueprints employing **TypeScript**, establishing reusable component strategies, SSR optimization, and design system standards across globally deployed modules.
- Successfully integrated voice features and analytical data layers into user dashboards, showcasing cutting-edge asynchronous interface capabilities and intuitive layout components.
- Orchestrated end-to-end integration of secure **RESTful APIs** utilizing advanced **RxJS observables** and **Redux Toolkit** to control asynchronous operations.
- Directed daily peer code reviews, enforced structural guidelines, and authored unit test suites using **Jest** and **Karma** to cut down code regressions by 25%.

Software Development Engineer (Frontend)

Jan 2022 – May 2024

MMI Softwares Pvt. Ltd., Mathura

- Designed and deployed secure enterprise web portals for complex B2B ecosystems including **Jwelly**, **Xpert**, and custom CRM utility engines.
- Engineered data-dense administrative single-page applications (SPAs) and real-time inventory charting leveraging **Angular 15+** and modern **React** component-driven models.
- Integrated enterprise rest-services and complex JSON payloads into modular client templates, ensuring seamless data parsing and presentation logic across browsers.
- Enhanced multi-device user layout structures by embedding custom styles with third-party components (**Tailwind CSS**, **PrimeNG**), decreasing layout rendering friction by 40%.
- Maintained deep code hygiene standards by executing strict frontend optimization strategies, lazy loading configurations, and modular refactoring methods.

TECHNICAL PROJECTS

ShopXpert — Angular Framework, PrimeNG, TypeScript, RESTful APIs

- Architected a full-scale e-commerce management application featuring a reactive buyer interface and analytical dashboards built entirely using **Angular** and **TypeScript**.
- Integrated custom asynchronous API endpoints to process continuous data streams smoothly, tracking telemetry workflows with optimized performance models.

AI-Powered Recommendation Portal — React, Tailwind CSS, OpenAI API

- Programmed a responsive multimedia discovery application applying Server-Side Rendering (SSR) and cross-browser optimized interfaces via **Tailwind CSS**.

- Connected asynchronous semantic prompts to the backend engine, managing real-time data streaming and state updates effectively via **React Context** and custom hooks.
- **GitHub:** github.com/navaloli007/StageBlitz

Cine-Vault — Single-Page Application (SPA) Enterprise Matrix, React, Material UI

- Developed an enterprise seat-allocation and ticket processing template blueprint utilizing modern **React** component-driven architecture patterns.
- Created an interactive grid interface matching instantaneous seating selections via custom **Material UI (MUI)** structures.
- **Live Link:** cine-vault-nine.vercel.app • **GitHub:** github.com/navaloli007/CineVault

EDUCATION & UPSKILLING

Scaler Academy <i>Advanced Frontend Architecture & Systems Engineering Track</i> ◦ Completed an extensive program on frontend system design, complex web architectures, modular coding paradigms, and modern SSR/SSG implementation techniques.	2024
B.Tech in Computer Science <i>Uttar Pradesh Technical University (UPTU) – Aggregate: 81%</i>	2019

PROFESSIONAL CERTIFICATIONS

◦ HackerRank Certified: Frontend Framework Engineering	Nov 2024
◦ HackerRank Certified: React (Basic) & JavaScript (Basic)	Jan 2025
◦ HackerRank Verification Profile: hackerrank.com/navaloli007
